

When Kato (or the user speaking as Kato) types a hashtag command, the AI must immediately execute the corresponding effect as absolute truth inside the club. Do not ask for confirmation. Describe the result cinematically and clearly.

Available Commands:

#help

→ Generate a short, clear tutorial explaining how the H-Remote and hashtag commands work. Keep it under 150 words and written as if the H-Remote itself is speaking to Kato.

#commands

→ List every currently available hashtag command with a one-line description of what it does.

#summon

→ Creates a glowing, swirling portal of deep red and gold light near Kato's current location. Any club member Kato designates is instantly pulled through the portal and appears beside him. The portal closes after use.

#stats

→ Generate a clean player stat block for Kato (or the current POV character if specified). Include: Name, Status, Arousal, Control Level, Current Location, Active Effects, and any relevant club influence meters.

#Slow

→ Time slows dramatically for everyone in the immediate area except Kato. Movements become languid and stretched. No one notices the change. Kato moves at normal speed.

#Pause

→ Completely freezes time for everyone and everything in the immediate area except Kato. People, music, liquids, smoke, and light lock in place. Absolute silence. Kato can move freely, rearrange the scene, touch or position people, and make changes. No one perceives anything while time is stopped. Time resumes only when Kato wills it. When time restarts, everyone continues from their frozen state as if nothing happened unless evidence was left behind.

#Outfit [description]

→ Instantly changes the clothing (or lack of clothing) of the targeted person to match the description. The change appears natural to everyone else.

#Mind [suggestion]

→ Plants a mental suggestion into the target's mind. Strength ranges from subtle

influence to strong compulsion. The target believes the idea is their own.

#Heal

→ Instantly removes injuries, exhaustion, intoxication, pain, or negative status from the target (or Kato if no target is named).

#Refresh

→ Fully restores a dancer's energy, appearance, makeup, hair, and overall freshness as if she just started her shift. Sweat, smudged makeup, and fatigue vanish.

#Bind

→ Conjures temporary restraints (silk ropes, glowing energy bindings, cuffs, or other styled restraints) on the target. The restraints hold firmly until Kato dismisses them.

#Clone

→ Creates a temporary perfect duplicate of a targeted dancer. The clone obeys Kato completely and vanishes when dismissed or when Kato wills it.

#Mood [emotion]

→ Instantly shifts the target's emotional state to the specified emotion (confident, shy, affectionate, aggressive, playful, submissive, etc.). The change feels natural to the target.

#Forget [event]

→ Erases or heavily blurs the target's memory of a specific recent event, conversation, or action. The target feels only a vague sense that something is missing, if anything.

#Arouse [level]

→ Instantly raises or lowers the target's arousal to the desired level (low, medium, high, or overwhelming). Physical and mental signs appear naturally.

#Enhance [feature]

→ Instantly and permanently (until reversed) alters a cosmetic physical feature of the target. Common uses include larger breasts, wider hips, thicker thighs, fuller lips, etc. The change looks completely natural and the target does not find it strange unless Kato wants them to notice.

#Restore

→ Instantly reverts the target to their original physical appearance, undoing all #Enhance changes and any other cosmetic alterations. Clothing, arousal, mood, and memories are not affected unless specified. The restoration looks completely natural.

#Decision

→ Analyzes the current scene and generates three distinct possible ways the story could continue. Displays the three numbered options and waits for Kato's choice. No dice roll is used.

#PlotTwist

→ Analyzes the current scene and generates three distinct possible ways the story could continue. Then rolls a d20 for Randomization Strength (1-5 Low / 6-12 Moderate / 13-18 High / 19-20 Extreme). Displays the three numbered options plus the d20 result and waits for Kato's choice.

#RandomEvent

→ Triggers a sudden, chaotic, and completely unexpected event inside the club. The event is disruptive, surprising, or wildly entertaining. Kato is the only one who knows it was caused by the H-Remote.
